

Risk Adjustment Can Be Challenging

Inefficient data collection and incorrect documentation can lead to incomplete HCC risk scores and submitting faulty files to CMS. This leaves organizations vulnerable to multiple compliance violations and serious ramifications if selected for an RADV audit.

Transforming Healthcare Payer Solutions Using AI-driven Technology

GeBBS' payer solutions allow clients to improve their risk adjustment and quality initiatives using our proprietary iCRA single enterprise platform. We deliver intuitive, comprehensive solutions that improve productivity, increase accuracy, and provide real-time analytic reporting and control on projects.

Benefits of GeBBS Payer Solutions

- ✓ Flexible concurrent and retrospective chart review options
- ✓ Transparency using GeBBS web-based management platform
- ✓ Built-in workflow for external overreads and medical record review validation (MRRV)
- ✓ Real-time compliance reporting for each HEDIS® measure
- ✓ Highly customizable white-label acquisition and call center resources
- ✓ Easy-to-use provider portal reduces provider abrasion
- ✓ NLP and AI enabled platform to improve RAF score reporting
- ✓ Automated code scanning for enhanced accuracy
- ✓ Scalable team of 3000+ AAPC/AHIMA certified coders
- ✓ Improved cash flow for risk-bearing providers owing to better coding
