

End-to-end Solution for Risk Adjustment

Did you know?

53% believe risk adjustment would be improved by better documentation and data quality. ¹

New Challenges Faced by Healthcare Organizations

Provider offices are struggling to remain open due to changing government policies.

Patients are now completing annual assessments via telehealth (making them ineligible for risk adjustment determination).

There is the potential risk of further pandemic outbreaks and COVID variants emerging.

A 2020 survey by Walters Kluwer showed that 67% of the survey participants spent more than 25% of their time on HCC risk adjustment.

Chart Acquisition

HIPAA-compliant
EMR CCD data exchange
Chart retrieval status
Concurrent and retrospective chart review
Real-time Irretrievable chart troubleshooting
