GeBBS® HEALTHCARE SOLUTIONS
Forward Thinking

Behavioral Health Revenue Cycle Management Solutions

Stop Revenue Leakage Before It Starts

Behavioral health revenue cycle management requires more than standard billing workflows. Payer-specific benefits, treatment authorization limits, documentation requirements, and complex reimbursement processes can leave facilities managing preventable denials, delayed payments, and growing administrative workloads. GeBBS Healthcare Solutions combines specialized healthcare operations teams, technology-enabled workflows, and end-to-end RCM expertise to help strengthen revenue performance and let your team focus on patient care.

Behavioral Health RCM Solutions That Address Your Biggest Challenges

From patient scheduling and authorization management to denial prevention and A/R recovery, GeBBS helps behavioral health organizations address the operational challenges that delay reimbursement and strain internal teams.

Patient Access & Scheduling

- Intake, registration, scheduling, and eligibility
- Behavioral health benefits and service limitations
- Patient communications and admin intake routing

Authorization Management

- Prior authorization workflows
- Track approved visits, treatment units, and expiration dates
- Flag approaching authorization limits and renewal deadlines

Specialized Coding & Documentation

- Coding for time-based and service-specific encounters,
- Validate documentation, modifiers, billing requirements, and identify documentation gaps

Billing & Claims Management

- Accurate and timely claim submission
- Payer-specific billing requirements and claim rejections
- Reduce preventable billing delays and rework

Denials & Accounts Receivable

- Analyze denial trends and recurring root causes
- Appeals, payer follow-up, and recovery
- Identify aging A/R and underpayments

AI, Automation & Analytics

- Reduce repetitive manual work
- Prioritize accounts and follow-up activities
- Improve visibility into denial patterns and RCM performance
